

An aerial photograph of a lush tropical forest. In the center, a waterfall cascades into a vibrant turquoise pool. The surrounding area is densely packed with green trees, including many palm trees. The scene is captured from a high angle, looking down into the forest.

Biodiversity Policy

BATHCO recognizes that biodiversity is critical to the sustainability of our business and to the health of the planet. We are committed to managing our operations in a way that protects and promotes biodiversity, and to minimizing our impact on the natural world.

BATHCO

To this end, we have adopted the following policy.

Where practicable:

Biodiversity Conservation

We will implement measures to conserve biodiversity in all areas of our operations, including but not limited to manufacturing, transportation, and office facilities. We will prioritize biodiversity conservation measures based on their potential impact on natural ecosystems, and will establish clear goals and metrics for measuring progress.

Sustainable Land Use

We will use land in a way that promotes sustainable land use practices, protects natural ecosystems, and minimizes the loss of biodiversity. We will work with local communities and other stakeholders to develop effective land use strategies, and will prioritize the protection and restoration of ecosystems and habitats that are critical to biodiversity.

Biodiversity Risk Management

We will identify and assess the risks associated with our operations that could impact biodiversity, including but not limited to physical, regulatory, and reputational risks. We will establish clear procedures for managing these risks, and will work with local communities and other stakeholders to develop effective biodiversity management strategies.

Reporting and Communication

We will provide regular updates on our biodiversity management activities to all relevant stakeholders, including employees, customers, suppliers, investors, and regulators. We will ensure that all stakeholders are aware of our commitment to biodiversity conservation and enhancement, and the measures we are taking to achieve our goals.

We recognize that effective biodiversity management is essential to the sustainability of our business, and we are committed to ensuring that all our employees are aware of their role in managing biodiversity and are fully supported in their efforts to do so.
