

Energy Management Policy

BATHCO recognizes that energy is a critical resource that is essential to our business operations and to the communities in which we operate. We are committed to managing energy use responsibly and sustainably, and to reducing our impact on the environment through energy conservation and efficiency.

BATHCO

To this end, we have adopted the following policy:

Energy Conservation

We will implement measures to conserve energy in all areas of our operations, including but not limited to manufacturing, transportation, and office facilities. We will prioritize energy conservation measures based on their potential impact on energy use, and where practicable, will establish clear goals and metrics for measuring progress.

Energy Efficiency

We will implement measures to increase energy efficiency in all areas of our operations, including but not limited to manufacturing, transportation, and office facilities. We will prioritize energy efficiency measures based on their potential impact on energy use, and where practicable, will establish clear goals and metrics for measuring progress.

Renewable Energy

We will explore opportunities to use renewable energy sources in our operations and will implement measures to increase the use of renewable energy where feasible.

Energy Risk Management

We will identify and assess the risks associated with our energy use, including but not limited to physical, regulatory, and reputational risks. We will establish clear procedures for managing these risks, and where appropriate, will work with local communities and other stakeholders to develop effective energy management strategies.

Reporting and Communication

When appropriate, we will provide updates on our energy management activities to all relevant stakeholders, including employees, customers, suppliers, investors, and regulators. We will ensure that all stakeholders are aware of our commitment to sustainable energy management and the measures we are taking to achieve our goals.

We recognize that effective energy management is essential to the sustainability of our business, and we are committed to ensuring that all our employees are aware of their role in managing energy resources and are fully supported in their efforts to do so.
