

Waste Management Policy

A person wearing a white protective suit, a respirator mask, and blue gloves is working in a waste management site. They are holding a small vial with an orange cap. The background is filled with various types of waste, including plastic bags, cardboard, and other debris.

BATHCO recognizes that waste management is essential to the sustainability of our business and to protecting the environment. We are committed to managing waste responsibly and sustainably, and to reducing our impact on natural resources through waste reduction, reuse, and recycling.

BATHCO

To this end, we have adopted the following policy.

Waste Reduction

We will implement measures to reduce the amount of waste generated in all areas of our operations, including but not limited to manufacturing, office facilities, and supply chain management. We will prioritize waste reduction measures based on their potential impact on waste generation, and will establish clear goals and metrics for measuring progress.

Waste Reuse

We will implement measures to reuse waste in all areas of our operations, including but not limited to manufacturing and supply chain management. We will prioritize waste reuse measures based on their potential impact on waste generation and where practicable, will establish clear goals and metrics for measuring progress.

Waste Recycling

We will implement measures to recycle waste in all areas of our operations, including but not limited to manufacturing, office facilities, and supply chain management. We will prioritize waste recycling measures based on their potential impact on waste generation and will establish clear goals and metrics for measuring progress.

Waste Risk Management

We will identify and assess the risks associated with our waste management practices, including but not limited to environmental, health, and safety risks. We will establish clear procedures for managing these risks and where appropriate, will work with local communities and other stakeholders to develop effective waste management strategies.

Reporting and Communication

When appropriate, we will provide updates on our waste management activities to all relevant stakeholders, including employees, customers, suppliers, investors, and regulators. We will ensure that all stakeholders are aware of our commitment to sustainable waste management and the measures we are taking to achieve our goals.

We recognize that effective waste management is essential to the sustainability of our business, and we are committed to ensuring that all our employees are aware of their role in managing waste and are fully supported in their efforts to do so.
